General Comment:

On 1/5/2023, Reclamation Specialist O'Malley conducted an interim reclamation and stormwater inspection at TEP Rocky Mountain LLC's CLOUGH-66S94W/28NWNW Location #311583 in Garfield County, Colorado.

The following compliance issues were observed during this inspection:
- Stormwater: lack of stabilization of pad surface

Refer to the "Reclamation" and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

Comment Areas of the location not needed for production, or no longer in use have been reduced and reclaimed. Interim areas appear vegetated with introduced perennial grasses (crested wheatgrass, Russian wildrye) and occasional native shrubs (sagebrush, rabbitbrush, greasewood, saltbush). If annual undesirable plant species and/or noxious annual weeds (cheatgrass) are present, they are not evident due to winter season and snow cover. A follow-up inspection will be conducted during a future growing season to determine compliance with 1003 requirements.

Comment: Previous inspection #700702498 observed location shows signs of lack of stabilization/compaction. Inspector required Operator to install or repair required BMPs by 5/3/2021.

It was observed in this inspection that the location shows signs of lack of stabilization/compaction. The pad surface is soft and inundated with ponding stormwater resulting in ruts. Tracking control BMPs to minimize/mitigate tracking and offsite sediment transport are missing or insufficient. BMPs do not appear to have been implemented with proper planning or good engineering practices to protect the site during wet/muddy conditions. There is no evidence the original corrective action has been addressed. Original corrective action and date remain applicable.

Corrective Action: Install or repair required BMPs. Date: 05/03/2021

Pits: NO SURFACE INDICATION OF PIT
