**General Comment:**

On 1/5/2023, Reclamation Specialist O'Malley conducted an interim reclamation and stormwater inspection at TEP Rocky Mountain LLC's BONNEVILLE-66S94W/28NENW Location #335309 in Garfield County, Colorado.

The following compliance issues were observed during this inspection:

- Stormwater: lack of stabilization of pad surface

Refer to the "Location," "Reclamation" and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

TRANSECT RESULTS OF DISTURBED AREA% _____	
TRANSECT RESULTS OF REFERENCE AREA% _____	
TOTAL % OF DESIRABLE VEGETATION COVER _____	
VEGETATIVE COVER _____	
1003 f. Weeds Noxious weeds? <u>P</u>	
Comment	Areas of the location not needed for production, or no longer in use have been reduced and reclaimed. Interim areas appear vegetated with introduced perennial grasses (crested wheatgrass, Russian wildrye, tall wheatgrass) and occasional native shrubs (rabbitbrush). If annual undesirable plant species and/or noxious annual weeds (cheatgrass) are present, they are not evident due to winter season and snow cover. A followup inspection will be conducted during a future growing season to determine compliance with 1003 requirements.

**Storm Water:**

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

  

**Comment:** Previous inspection #700702500 observed location shows signs of lack of stabilization/compaction. Inspector required Operator to Install or repair required BMPs. Operator submitted FIR Resolution stating "Required BMPs have been installed or repaired".

It was observed in this inspection that the Location shows signs of lack of stabilization BMPs, as is evidenced by the presence of ruts. Tracking control BMPs to minimize/mitigate tracking and offsite sediment transport are missing or insufficient. BMPs do not appear to have been implemented with proper planning or good engineering practices to protect the site during wet/muddy conditions.

**Corrective Action:** Install or repair required BMPs per Rule 1002.f. Continue to monitor and manage stormwater on the Location. Ongoing stormwater management is required until the site receives a passing final inspection.

**Date:** 02/10/2023

  

**Pits:** ☒ NO SURFACE INDICATION OF PIT
