General Comment:

on 1/10/2023 COGCC staff, Kris Neidel was inspected the Iles Dome Unit Pits and discharge. Weather; heavy snow covered the ground, 25 degrees, low clouds, some snow. COGCC was notified by Colorado Parks and Wildlife Officers that a goose was dispatched on 1/9/2023 due to "not being able to fly" as a result of being covered in oil from the POC-I facility. Upon arrival, Staff contacted pumper, Terry Berman and the surface Owner Mr. Charchalis. Mr. Charchalis was present to observe the recent spill, reduction in water flow (discharge) and his livestock. COGCC staff observed; three production pits, pits had oil (rainbow and solids) covering the surface of the water, staff walked the discharge to Seeping Spring Gulch, Oil was observed in the discharge as rainbows and solids on soil and vegetation, the discharge flow was reduced to a fraction of previously observed volume, staff was told (by pumper) that the flow was set to a minimum level to prevent freezing. COGCC staff collected a water sample from the Seeping Spring at the discharge and a soil sample from Seeping Spring near the discharge. Corrective Actions: Discharge water shall comply with Table 915-1 concentrations. Impacts to Seeping Spring Gulch soil and water shall be investigated and remediated to Table 915-1 levels. A Form 27, Remediation Work Plan shall be submitted
