General Comment:

On 1/23/2023, Reclamation Specialist O'Malley conducted a final reclamation and stormwater inspection at TEP Rocky Mountain LLC's SILT VALLEY-66S92W/22SESE Location #335438 in Garfield County, Colorado.

The following compliance issues were observed during this inspection:

- Noxious weeds
- Stained soil below tank drain line

Refer to the "Location," "Reclamation" and "Stormwater" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

LocationOverall Good: ☐

Emergency Contact Number:

Comment: Corrective Action: Date: **Good Housekeeping:**

Type	WEEDS		
Comment:	A patch of Russian knapweed (List B Noxious) was observed within the interim area to the southwest of the northern production pad (see attached photo for coordinates). Operator is encouraged to treat as soon as possible, but also to verify species identification and determine the appropriate measures (type and timing) to treat the particular species; Russian knapweed is particularly sensitive to fall treatment.		
Corrective Action:	Conduct weed management to prevent further establishment and spread of noxious weeds; ongoing weed management required until location passes final reclamation.		Date: 06/01/2023

1003 f. Weeds Noxious weeds? F

Comment Refer to the "Location" section of this inspection report for weed control corrective action.

Areas of the location not needed for production, or no longer in use have been reduced and reclaimed. Introduced perennial grasses (crested and tall wheatgrass, Russian wildrye) appear established. However, assessment was impeded by snow cover. A follow up inspection will be conducted during a future growing season to determine compliance with 1003 requirements.
