General Comment:**COGCC Inspection Report Summary**

On Thursday 2/16/2023, I, Inspector Scott Ramsey, conducted a follow up inspection at KPK South McCallum tank battery, at Location # 480891 in Jackson county Colorado.

Any Corrective Actions from previous Inspections that have not been addressed are still applicable.

While there, I observed normal operations. This location is within or in close proximity to a CPW Density/High Priority Habitat, black bear, NSO habitat, Wildlife black bear Management and Density habitat.

C/A's from previous inspection (Propane torch inside secondary tank containment and tank thief hatch open) document # 707800185 have been completed. Propane torch was removed and thief hatch was closed. All other C/A's are still in place.

During this inspection the following possible compliance issues were observed:

1. Random debris
2. Multiple staining at tanks and well head.
3. Lack of battery signage.
4. Open holes for wildlife to enter.
5. Line on tank not capped or plugged.
6. Diesel tank labeling is illegible
7. Diesel tank is lacking secondary containment.

Refer to photograph of observed compliance issue.

A follow up on this site inspection will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules. This is a summary of inspection report.
