COMMENTS:

TEP Rocky Mountain LLC (TEP) is reporting that the bradenhead on the Union TW 1-32 was connected to the sales line as part of a Pressure Management Plan for this well. The average sales line pressure for this well is 120 psi and the connection to the sales line will effectively manage the bradenhead pressure below the COGCC approved threshold pressure of 150 psi. The bradenhead was connected to the sales line with steel pipe and a check valve. A typical diagram is attached which depicts the bradenhead connection. This Sundry is a subsequent report to COGCC Document # 403296229.
