1002c. PROTECTION OF SOILS _____ Fail _____

Comment The topsoil stockpile has bare patches and has weedy vegetation with no perennial vegetation establishment that would out compete the weeds. One of the benefits of perennial vegetation is that it serves to stabilize the soils. Operator has failed to prevent weed establishment on the topsoil stockpile at the location.

Corrective Action Comply with Rule 1002.c.

<p>Per Rule 1002.f., oil and gas operators shall implement and maintain Best Management Practices (BMPs) at all oil and gas locations to control stormwater runoff in a manner that minimizes erosion, transport of sediment offsite, and site degradation. BMPs shall be maintained until the facility is abandoned and final reclamation is achieved pursuant to Rule 1004. Operators shall employ BMPs, as necessary to comply with this rule, at all oil and gas locations, including, but not limited to, well pads, soil stock piles, access roads, tank batteries, compressor stations, and pipeline rights of way. BMPs shall be selected based on site specific conditions, such as slope, vegetation cover, and proximity to water bodies, and may include maintaining in-place some or all of the BMPs installed during the construction phase of the facility. Where applicable based on site-specific conditions, operators shall implement BMPs in accordance with good engineering practices.</p>	woldr	03/20/2023
