General Comment:

On 3/24/2023, Reclamation Specialist Trujillo inspected Chevron USA's A C MCLAUGHLIN 59AX location in Rio Blanco County, Colorado.

Well records show Chevron USA Inc as the designated Operator for the Location. Form 9(s) 402891516 transferring the Location/Well from Chevron to Scout Energy management currently "in process". Chevron remains the Operator responsible for the management of the Location until the Form 9 is approved.

The following compliance issues were observed during this inspection:

-Stormwater: Missing or insufficient tracking BMPs on working pad and access road

Refer to the "Location", "Reclamation" and "Stormwater" sections of this inspection report for additional details.

See inspection #696204791 and #696204758 regarding tracking issues onto Hwy. 64.

Refer to the photo-documentation of the observed compliance issues attached to this report.

Any corrective action(s) from previous inspections that have not been addressed are still applicable.

A follow up inspection on this site will be conducted to ensure the compliance issues have been corrected to comply with COGCC rules.

STORWMATER COMMENTS	trujilloam	03/27/2023
It was observed in this inspection that stormwater, tracking, and erosion control BMPs are missing or insufficient throughout the Location, and access road: -BMPs to stabilize, as well as to minimize degradation, tracking and offsite sediment transport are missing or insufficient at the Location, as well as at the access road leading to and beyond the Location; erosion degradation, tracking and sediment transport observed. Access road does not appear to be adequately engineered to manage runoff and to minimize degradation, tracking and sediment transport; refer to inspections #696204791 and #696204758 regarding tracking/sediment transport onto Highway 64.		
Stormwater and related access road issues appear to be prevalent throughout the entire Field.	trujilloam	03/27/2023
