Re: Herbicide Application

Precision Industrial Applicators' Pad Applications would Include:

- **Little Lady North Pad** – Spraying Bare ground herbicide (Plainview and Rangestar) 20 ft out of and around all equipment and wells. All reclaimed areas will be treated selectively with a broadleaf treatment (fluroxypyr and surfactant) to kill weeds and maximize nutrients for the grass to thrive or establish.
- **Little Lady North Pad** - Spraying Bare ground herbicide (Plainview and Rangestar) 20 ft out of and around all equipment and wells. All reclaimed areas will be treated selectively with a broadleaf treatment (fluroxypyr and surfactant) to kill weeds and maximize nutrients for the grass to thrive or establish.
- **Salt Ranch Fee Pad** – Spraying Bare ground herbicide (Plainview and Rangestar) 20 ft out of and around all equipment and wells. Plus 20 ft around the perimeter of pad on the road base to control all areas on location not graded or dragged. The first 3.6 miles of road will be spot treated for weeds and the last 1.6 miles will be sprayed selectively (rejuvra and fluroxypyr) to kill all broadleaf weeds but let the grass remain.

-All applicators are licensed by the State of Colorado

Thanks for the opportunity.
