### DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
UNDETERMINED	SOILS	Unknown	Field screening and analytical results.
UNDETERMINED	SURFACE WATER	Unknown	Field screening and analytical results.

### INITIAL ACTION SUMMARY

Description of initial action or emergency response measures taken to abate, investigate, and/or remediate impacts associated with E&P Waste.

The COGCC Orphan Well Program will be plugging the Buckeye (OWP) #2 well and decommissioning any associated on location flow lines and/or production equipment. Soil samples will be collected in accordance with COGCC Rule 915.e(2)B. Samples will be collected from the wellhead excavation, flow line path(s), as well as any other area likely to have been impacted. Samples will be submitted for laboratory analysis of Table 915-1 constituents.

### PROPOSED SAMPLING PLAN

#### Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Soil samples will be collected for laboratory analysis of Table 915-1 constituents from areas most likely to have been impacted. Visual inspection and field screening of soils will be conducted in the areas surrounding the flow line(s) if present, and the well head. Based on these observations, soil samples may be collected and submitted for laboratory analysis of Table 915-1 constituents. Discrete soil samples will be collected for confirmation of compliance with Table 915-1.  
Soil samples were collected on 8/8/22. Analytical results are attached.

#### Proposed Groundwater Sampling

☒ Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

If a pathway to groundwater is discovered or groundwater is encountered during remediation activities, a sample(s) will be collected and analyzed for Table 915-1 constituents and notice given to COGCC EPS staff. No groundwater was encountered.

#### Proposed Surface Water Sampling

☒ Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

Base line surface water samples will be collected prior to any surface disturbance. A sample of the fluid on the surface near the wellhead will be analyzed for Rule 615.e.(2) and Table 915-1 constituents.  
Samples from the Larkin Ditch (upstream and downstream of the confluence of any apparent drainage features) will be analyzed for Table 915-1 constituents, assuming that the irrigation ditch is flowing.  
Samples of the Larkin Ditch (upstream and downstream of the confluence with water produced from the Buckeye #2) and the water from the well were collected on 7/11/22. Results attached.

### Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan ( summary ):

If baseline water samples indicate exceedances of any Table 915-1 organic compounds in groundwater, fluids encountered during implementation of this proposed REM Project will be collected and disposed of at an approved facility.  
If surface water discharge samples demonstrate 915-1 exceedances, a groundwater monitoring plan will be developed.

## SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

The Buckeye (OWP) #2 well will be re-entered, plugged, and abandoned. Any/all production equipment associated with this well on the Oil and Gas Location will be removed or decommissioned.
