List B Noxious musk thistles rosettes observed throughout the northeastern interim area. Refer to the "Location" section of the report for weed control corrective action.

Areas of the location not needed for production, or no longer in use have been reduced and reclaimed. Interim areas are well vegetated with introduced perennial grasses (smooth brome, crested wheatgrass, intermediate wheatgrass) and native shrubs (sagebrush, four-wing saltbush, rabbitbrush). Vegetation appears to be progressing towards 1003 vegetation standards.
