CORRECTIVE ACTIONS:

6 CA# 170306

Corrective Action: Perform reclamation in accordance to Rule 1003. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until the location meets Rule 1003 standards. Corrective action date is the date the location was observed out of compliance.

Comment:

Pursuant to 1003.b. All disturbed areas affected by drilling or subsequent operations, except areas reasonably needed for production operations

The active location surface area around the 21A-12 well is larger due to continuous use of heavy machinery to maintain pit banks on the North and West side of the pit. Without permanent access to do so we would be unable to maintain the produced water pit. We are well within our rights of the surface use agreement to have continuous operations in the entire area outlined in black on the attached pic to perform this necessary maintenance. After produced water pit maintenance that occurs in the future we will be sure to level the tracks from heavy machinery used in this area to prevent wind erosion.
