Comment:

This location does not comply with Rule 1004. During this inspection, Staff observed that the access roads do not appear to have been reclaimed with evidence of road base throughout, and no indication that the access roads have been graded/contoured to reflect adjacent topography (e.g. cut banks). The former well location and production areas (including pits) are not progressing towards Rule 1004 standards with areas of bare soil and uniform vegetation cover of Colorado List C Noxious Weed (e.g. cheatgrass) observed. The adjacent reference areas do not have any evidence of cheatgrass, therefore, the Operator shall control ASAP to prevent spread onto adjacent range. Refer to attached inspection photos for documentation.

Corrective Action:

Comply with Rule 1004. Reclaim access roads, contour/grade entire location, and reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management. Corrective action date is the date the location was observed out of compliance.

Date **05/15/2023**
