**General Comment:**

On 6/5 and 6/6 Compliance supervisor Steve Labowskie insepcted site and found well producing, separation equipment running and gas venting to an open top tank (presumably from well/open plunger lift). Gas meter was not running and there was no calibration record present. 24 hour operator contact number is invalid. Operator contacted at number given to COGCC by former employee.

Well has been reported as shut in, no monthly Form 7 reporting since 2017. Well was due for MIT 2//5/23. No Form 42 notice for return to production.

Operator was also told verbally on phoine at 13:45 6/6/23 that they must immediately stop ventring and electronically otify COGCC if well has been returned to service. Update monthly Form 7 reporting and meter gas and calibrate meter. Conduct and submit annual bradenhead test and contact COGCC enginnering about 5 year MIT which was due no later than 2/5/2023 and install a valid 24 hour operator contact #
