COMMENTS:

Hilcorp will vent the BHD valve of the Tinker 2-9 WD for 90 days beginning July 10th. During the 90 days, Hilcorp will record the open BHD pressure every 14 days. After the initial blow down of the well, Hilcorp will attempt to measure the volume of gas using conventional means. If the gas flow is too small to measure using conventional means, Hilcorp will attempt to measure the volume of gas using other means to get an estimate. At the end of the 90 days, Hilcorp will shut the well in and perform another BHD test after 24 hrs SI. All recorded pressures and flow rates will be submitted. HEC discussed the plan with Craig Burger on 6/29/2023.
