Subject: [External]:RE: Mcclement 1 Verdad/Tallgrass Surface Access Permission

Alex,

Thank you for all the information. Yes, Verdad has permission to access the property. As mentioned, please have your surveyors in reflective gear while on site. If any of our Tallgrass operations members have questions while your surveyors are in the field, please direct them to me and I can reiterate the access permission. Once we have identified the access route, we'll make sure and notify our operations team of your scheduled re-plugging.

Thanks,

Subject: EXTERNAL: Mcclement 1 Verdad/Tallgrass Surface Access Permission

EXTERNAL:

Hi Tierce – Thanks again for getting back to me. As we discussed on the phone, we will be plugging the Mcclement 1 (API 05-123-05728) and need surface access permission from you guys. The well is located just North of your facility, we will first send surveyors to locate the well, then we will come up with an agreed access route, and then we will move in our workover rig to perform the re-plugging. The timing will be within the next month or month and a half. Once I receive permission from you, I will submit the Form 6 to the COGCC and once we get approval, we will move on to the well shortly after.

Do we have permission to use your surface to access this well?

Thanks,

Alex Waner
