☐ Final reclamation complete, site ready for inspection. Per Rule 1004.c(4) describe final reclamation procedure in Comments below or provide as an attachment.

Field inspection will be conducted to document Rule 1004.c. compliance

Comments:

The Subject Well Site has been plugged and abandoned, and ENR has completed a majority of the reclamation requirements to restore the land to its pre-development condition consistent with landowner consent, including removing all associated production facilities and equipment and revegetating disturbed areas. ENR and the surface owner entered into Surface Owner Waivers for the access points, roads, and small improvements the surface owner wants to retain. Upon 2022 inspections, it has been determined that the following work is still necessary on the Subject Well Site in order to complete all of the reclamation requirements: Reseeding of the pad, approximately 1.0 acres to reach 80% vegetation requirements. Fixing rill erosion on the cut slope, and from the road at the entrance to the pad.

The Application for Rule 502 variance from the final reclamation requirements of Rule 1004.a for access points and roads, including roads that predate oil and gas development, and other small discrete improvements that the surface owner wants to retain at the Pat Well Site in Las Animas County, Colorado is GRANTED.
