Thanks Terry - Bison will provide copies of the plugging reports and will reclaim any surface on your property that is disrupted from its current state by the re-plugging operation. I will be sure to keep you in the loop as we move along and let you know when the crew will be out there.

Thanks again,

Consent to plugging of Andrews 8-7, is given, providing that Bison, assignees, and contractors agree to 1) copy of plugging reports, and 2) rehabilitate the location, access road, and any surface that is disrupted from current state.

Good afternoon Terry,

Thanks for the call today. As discussed, Bison will need to re-enter and re-plug the Andrew 8-7 Well (API:05-123-14755) prior to upcoming competition operations. I have attached an aerial showing the location of the well. Would you please respond to this email providing your consent to access and re-plug the Andrews 8-7 well on your property.

Please let me know if you have any questions.

Thanks,
