Comment **This location does not comply with Rule 1003. Revegetation efforts of impacted/salt kill areas do not appear to be progressing towards Rule 1003 regulations and standards. During this inspection, Staff observed that areas of the salt kill area are comprised of non-uniform vegetation cover resulting in bare/exposed soils, undesirable vegetation (e.g. kochia), and stressed vegetation. Additional reclamation activities are required for this location. Refer to attached inspection photos for documentation.**

Corrective Action **Comply with Rule 1003. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until the location meets Rule 1003 standards.**

Well Release on Active Location ☐Multi-Well Location ☐**Storm Water:**

Loc Erosion BMPs	BMP Maintenance	Lease Road Erosion BMPs	Lease BMP Maintenance	Chemical BMPs	Chemical BMP Maintenance	Comment

Comment: This location does not comply with Rule 1002.f Rules. During this inspection, Staff observed evidence of erosion degradation occurring on the access roads, in and around the pit walls, and off location into adjacent salt kill areas. Stormwater control BMPs are not properly installed, have degraded, or are inadequate for the location. It does not appear any stormwater repairs or control/BMPs have been implemented since previous inspections. Refer to attached inspection photos for additional documentation.

Corrective Action: Comply with Rule 1002.f.(2) to install BMPs in accordance with good engineering practices and repair erosion degradation.

Date: _____

Pits: ☐ NO SURFACE INDICATION OF PIT**Attached Documents**You can go to COGCC Images (<https://cogcc.state.co.us/weblink/>) and search by document number:
