RE: Mayberry #1 Well

Gentlemen:

On October 5, 1983 we received your Application for Permit to Drill your #1 Mayberry in the NE4NE4 of Section 4, Township 34 South, Range 41 West, 6th P.M., Baca County, Colorado. The area had been previously spaced for Topeka-Lansing production and your location was not in accord with that spacing. Mr. Larry Robbins of this office, contacted your office to determine the area to be committed to the well prior to recommending it for my approval. No response was received by this office, and the permit had not been approved before the well was drilled and plugged on October 25, 1983.

You are hereby directed to assure that approval has been given for any subsequent permits prior to commencing drilling operations. The members of our staff are authorized to give verbal approval where all conditions meet the requirements of the rules and regulations of the Commission.

You will note that I have approved your applications on October 7, 1983, since our relationship to date has been good, and there have been no previous violations. If you have any questions regarding this matter, please do not hesitate to contact me.

Very truly yours,

William R. Smith, P.E.
Director
