SPEARMAN, TEXAS

OIL & GAS
CONSERVATION COMMISSION

July 19, 1965

The Oil and Gas Conservation Commission
State Services Building
1525 Sherman Street
Denver 3, Colorado

Gentlemen:

Horizon Oil & Gas Co. dually completed the Nicodemus No. 1-6 and filed with the Oil and Gas Conservation Commission dual completion data on October 19, 1962. On July 7, 1965 we filed the OGCC Form 10 on this well (Cherokee and Waubaunsee zones) but did not receive approved copies of the Form 10.

This well was completed as a gas producer from the Cherokee zone, 4134 to 4140, and also as a gas producer from the Waubaunsee zone, 2920 to 2928. The Cherokee open flow potential was 19,000 MCF with a shut-in pressure of 828.4# psia. The Waubaunsee potential test was 910 MCF with a shut-in pressure of 474.8 # psia.

Please advise us if any additional information is required, to dually complete well, as we have an immediate pipeline connection.

Yours very truly,

HORIZON OIL & GAS CO.

Everett R. Tracy
Production Manager
