**Subject:** Croissant 30-13 and Betz 30-15 Access Routes

Good Afternoon,

We are receiving numerous complaints from the Christensen's about our traffic and use of access roads on their property.

Please ensure that all traffic is routed to the about wells along the following routes. Additionally, they have let us know that our vehicles regularly drive off the roads that are rutted/muddy and into they grass when accessing these sites. Additionally, they have let us know that some of our employees/contractors/vendors have stopped at the boat ramp to eat lunch/take a break. They operate a fishing and hunting business on the property/at the private lake. Please remind everyone on your teams that may access the property, not to stop at the boat ramp or elsewhere on the property when accessing these sites.

I believe the Croissant is a cold route and the Betz 30-15 is at some point in the flowline removal/reclamation process. If you could pass these requests along to our contractors/vendors that may be access these sites, it would be greatly appreciated.

Regards,  
Anthony Rader
