June 4, 1959

Mr. B. A. Von Burg
2959 North Ave.
Grand Junction, Colo.

Dear Mr. Von Burg:

This is written with reference to the conversation that was held in our office on May 29, 1959, regarding the Frank Hynes well.

At the time, I told you we did not have a file on this well. Further checking did turn up a file on the well. Your information was T-2S, R-3W, while the well actually is in T-2N, R-3W.

Our engineer, Mr. Frank Piro, visited Carl Losey in November, 1958, to see if the well could be plugged. At that time, Mr. Losey said there was some litigation as to ownership of some well equipment, and he wanted to wait to plug the well pending the final outcome of the litigation.

Mr. Piro plans on being over there again next week, and will try to contact you.

As I mentioned to you before, there is no position open at the present time, but if the need for a well inspector arises we certainly will give you every consideration.

Very truly yours,

OIL AND GAS CONSERVATION COMMISSION

D. V. Rogers, Deputy Director
