17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Well was drilled to a total depth of 4222' which was into the Carlisle member. No oil shows of any kind were encountered. Well drifted down a fault zone. Well was plugged and abandoned on May 25, 1967. Shale cuttings and 5 sacks of cement were placed at about 2000 feet. Another plug of 5 sacks were placed at bottom of surface casing at 670 to 655 feet. The 650' of surface casing (3 1/2" - 22#) was pulled and salvaged. A well marker is placed in a cement plug at the surface in the top of the conductor casing. The location will be cleaned and levelled.
