Re: SE1/4 of the SE1/4, Section 11, T. 1 N, R. 102 W, of the  
6th P.M., Rio Blanco County, Colorado.

Dear Dennis:

As I mentioned in our telephone conversation today, I am writing to inquire about the above-mentioned 40 acre tract. I have had great difficulty in making a determination as to how much oil has been taken, and continues to be taken, from this tract dating back to the mid 1950's. The opinions I have received have varied greatly.

In particular, and subject to whatever limits you have on information available to you, I am most interested in learning the following:

1. Is there current production occurring on the property, and if so, to what extent.
2. Has there been production on the property dating back to 1955, and if so, to what extent.
3. What companies, if any, have been involved in production on the property during those time periods, and most importantly, who, if anyone, is producing at present.
4. Any information concerning the present operator under U.S. Government Lease Serial, Denver 033804(b), which contains additional lands other than this specific property.

Enclosed is a copy of a letter written by your organization in 1957 which indicates that oil production was occurring on the property during that time. I thought this letter might be helpful to you as a starting point.

Thank you very much for your assistance in this matter, and please don't hesitate to give me a call with any questions or comments. If my request for information is beyond the scope of

your office, I would certainly appreciate your suggestion as to any other organizations who may have such information. I look forward to hearing from you.

Sincerely,

Glenn H. Lubel

Enclosure

Mr. Dennis Mitchell  
Office of the State Engineer  
1000 North Lincoln Street  
Denver, Colorado 80202

Dear Mr. Mitchell:

As I mentioned in our telephone conversation last week, I have been having some difficulty in determining the exact location of the property in question. I have been looking at the maps and the aerial photographs, but I am still not sure. I would appreciate your help in this regard.

I am very interested in learning the information available to you, and I am sure that you have a great deal of information on this subject.

Is there any current production occurring on the property, and if so, to what extent?

Has there been production on the property during the period 1982, and if so, to what extent?

What companies, if any, have been involved in production on the property during these time periods, and what information do you have regarding their production?

Any information concerning the present operator under the Government Lease Serial Number 031804(b), which includes additional lands other than this specific property?

Enclosed is a copy of a letter written by your organization in 1987 which indicates that all production was occurring on the property during that time. I thought this letter might be helpful to you as a starting point.

Thank you very much for your assistance in this matter, and please don't hesitate to give me a call with any questions or comments. If my request for information is beyond the scope of your organization, please let me know.
