17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The tubing and pump jack was removed from this well for the Coal Draw #3 well. Production in this well had dropped to practically nothing and water was coming in. From December 4 to 14 this well was drilled deeper to 4102' and no additional oil was encountered. It was therefore abandoned in the following manner:

- A. An unsuccessful attempt was made to pull the 5½" casing (3150').
- B. Installed 30-sk cement plug from 3250' - 3100' across bottom of casing.
- C. Installed 20-sk plug across perfs in casing at 2375' to 2225'.
- D. Installed marker in 5-sk cement plug at surface.
