CORRECTIVE ACTIONS:

1 ☒ CA# 169582

Corrective Action: Reduce areas no longer needed for production by 5/31/2023. If areas are reasonably needed for production activities, provide documentation in a factual review that outlines why areas outside a 100 foot radius of the well are necessary for production per rule 1003.b.

Date: 05/31/2023

Response: CA COMPLETED

Date of Completion: 05/31/2023

Operator Comment: Per discussions with ECMC, the requested additional reclamation work will be completed during the month of December 2023. TEP requested an extension of the CA due date for several reasons: 1) The original CA due date (5/31/23) was not achievable due to extremely soft and muddy site conditions that persisted into June 2023. 2) Contractor availability has been poor during the summer months of 2023. This project will likely take several weeks to complete, and TEP simply did not have contractors with time, personnel, or equipment available to do

this job during the summer months. 3) In coordinating this work with the land owner, the land owner has requested that TEP not perform this work during any of the various hunting seasons that occur during the months of September, October, and November. To accommodate the desires of the surface owner, TEP has scheduled this work to be completed during the month of December 2023. TEP will submit another FIRR to document completion of the work and provide photos showing that the work has been completed by 12/31/23.

COGCC Decision: Approved pending re-inspection
