Comment: Appears the Operator has performed final reclamation activities in response to the 2015 corrective action inspection, with the evidence of some native plant recruitment on location but the location does not comply with Rule 1004 standards. Location does not have uniform vegetative cover and there is weedy annual vegetation, including kochia and russian thistle, that is not reflective of reference areas.

Corrective Action:	<p style="color: red; margin: 0;">Comply with Rule 1004. Reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.</p>	Date 10/17/2023
