Brandon,

On August 31st, PDC discovered an historic release within 300 feet of waters of the state, which is an artificial pond that appears built for flood irrigation. The release was discovered at the meter house of an extended sales line (40.018577, -104.843964). Please let me know if you have any questions,

Subject: Briggs Aggregate 1-25 - Historic Release (Sales Line)

Rachel,

Good morning. This is notification PDC discovered an historic release during abandonment of the Briggs Aggregate 1-25 (40.018577, -104.843964) gas sales line on 8-31-2023. At this time, groundwater has not been encountered and the release appears localized near a 90 turn in the sales line. Delineation and clean-up operations are underway.

Feel free to reach out to me with questions or information requests.
