December 8, 1964

Mr. Joe Robinson  
Piceance Creek  
Meeker, Colorado 81641

Dear Mr. Robinson:

In 1960 the United States Development Corporation filed an intention to, and did, drill a #1 Banker-Robinson Ranch well. Bond was posted on this well to assure that it be properly plugged if it turned out to be a dry hole.

In December of that year, the company advised that they had drilled to a depth of 1700 feet and had set 5½" casing to 1500 feet, after encountering water all the way. Since that time we have had no additional information from them.

On November 5, 1964, representatives from this office checked the location and found the hole to be standing full of water, slight gas bubbles passing through the water, and determined that the well had not been plugged. It is now our intention to secure the proper plugging of this well by acting on the bond that was posted.

One of the rules of this Commission provides that a well to be plugged which may be safely used as a fresh-water well and which use is desired by the landowner need not be plugged provided that written authority for such use is secured from the landowner, and in such written authority the landowner assumes the responsibility to plug the well upon its abandonment as a water well, in accordance with the rules of this Commission. Of course, it is also necessary to file for a permit with the State Engineer's Office.

With the feeling that this might be of beneficial use to you, we would like to offer the well to you and will make the proper change of ownership in this office if you file a letter, as noted above, by December 21, 1964.

Since I am not sure who is the rancher involved, I have sent this letter to the men listed below. If you have information which would indicate another party should be considered, please let me know.

Very truly yours,

OIL AND GAS CONSERVATION COMMISSION  
OF THE STATE OF COLORADO
