Site Investigation and Remediation Workplan (Initial Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Closure request is not available for an Initial Site Investigation and Remediation Workplan.

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

The site will be visited for initial investigation of site conditions and collection of soil samples from the pit. Soil sampling will be conducted as outlined below and in accordance with Rule 915.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

A total of five grab soil samples will be collected, including one from pit center, and one from each side wall. Samples will be retrieved at 1 foot intervals down to 5 feet using a hand auger. Each interval will be field screened using a Photoionization Detector (PID). The interval with the highest reading will be kept and sent to the lab for analysis against Table 915-1. If all sample field screen readings are similar, and there are no visual impacts or odors indicating hydrocarbons presence, the 5-foot depth sample will be kept. Sampling Map is attached.

Proposed Groundwater Sampling
