VEGETATIVE COVER _____

Comment:

	<p>Operator submitted a Form 4 Sundry Notice stating the above well was not drilled. The Form 2A expired on 09/25/2008. The location was constructed at the proposed well location based off field observations and therefore requires final reclamation.</p> <p>It does not appear any reclamation work has been performed; annual vegetation was observed throughout the location footprint which includes cheatgrass and russian thistle and the pad footprint is evident on the landscape.</p> <p>Refer to the attached inspection photos.</p>	
Corrective Action:	<p>Comply with Rule 1004. Reseed disturbance areas using a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Ensure erosion controls are implemented to stabilize the seeded soil. Operator shall continue to monitor and manage this site until the location meets Rule 1004 standards, including stormwater and weed management.</p>	Date 11/15/2023
Overall Final Reclamation	Fail	Well Release on Active Location <input type="checkbox"/> Multi-Well Location <input type="checkbox"/>
