15. INDICATE BELOW BY CHECK MARK NATURE OF REPORT, NOTICE OR OTHER DATA

NOTICE OF INTENTION TO: (Submit in triplicate)

Test Water Shut-Off  Pull or Alter Casing   
Fracture Treat  Recomplete   
Shoot or Acidize  Abandon   
Repair Well  Change Plans

SUBSEQUENT REPORT OF: (Submit in duplicate, triplicate on state lands)

Water Shut-Off  Repairing Well   
Fracture Treatment  Altering Casing   
Shooting or Acidizing  Abandonment   
(Submit in triplicate)

(Note: Report results of multiple completion on Well Completion or Recompletion and Log form.)

16. DESCRIBE PROPOSED OR COMPLETED OPERATIONS. Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.

This well was drilled by Jepco in 1973 to a total depth of 2403'. 4 1/2" casing was run to 2366 and cemented with 300 sax cement. Calc. top of cement behind casing is 400'. The casing was perforated 2084-2128 and swab tested water. A cast iron plug was set at 2000'. The casing was then perforated 1916-1922, 1898-1906, and 1837-1847 and swab tested water. Operations were suspended @ 4:30 p.m. on 8/9/73. Water samples from both swab tests were sent to Halliburton for analyses. The Colo. Oil & Gas Conserv. Comm. called upon the USF&G as surety on the Oil & Gas bond to plug this well. Requests were made in April, 1976. Attempts to contact Jepco, Inc. were not successful and on Oct. 5, 1976. The well was plugged by pumping 50 sax cement down the 4 1/2 casing leaving a top plug at 1800'. 37' of cement covers the top perf.

**INSTRUCTIONS**

Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud of other material placed below, between and above plugs; amount, size, method of parting of any casing, linear or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.

Space 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements.

**AFFIDAVIT OF PLUGGING**

State of Wyoming, }  
County of \_\_\_\_\_ } ss.

Before me, \_\_\_\_\_, a Notary Public in and for the said County and State, this day personally appeared \_\_\_\_\_, who being first duly sworn, deposes and says that he is employed by \_\_\_\_\_ as \_\_\_\_\_ in charge of well plugging in the \_\_\_\_\_ field; that he has read over and subscribed the foregoing well abandoning and plugging operations and the statements contained therein are true.

\_\_\_\_\_  
\_\_\_\_\_  
Subscribed in my presence and sworn to before me this \_\_\_\_\_ day of \_\_\_\_\_, 19\_\_\_\_

Notary Public.

My Commission expires \_\_\_\_\_
