17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Well was drilled to a total depth of 4969 with air. Top of Carlile shale was present @ 4950. Tests were run on minor oil and gas shows encountered in the Niobrara from 4110 to total depth. Have set Halliburton DMDC bridge plug in 7" casing at 1896'. Well head capped and have temporarily abandoned well. Presently contemplating removing bridge plug and further testing or treating potential oil zones in Niobrara. Will either erect dry hole marker and abandon well or conduct further test during next 60 days.
