## \* DESCRIBE LEASE

Plan to re-enter temporarily abandoned hole, drill out Halliburton  
DM plug and clean out well to T. D. (approx. 4950').

Plan to test well for oil fill up; first by bailing, and then by  
running tubing and swab testing. If successful, plan to run casing and  
complete well.

Plan to begin work September 17, 1975.

IN ABOVE SPACE DESCRIBE PROPOSED PROGRAM: If proposal is to deepen or reenter and operate, give data on present productive zone and proposed new productive zone. If proposal is to drill or deepen directionally, give pertinent data on subsurface locations and measured and true vertical depths. Give blowout preventer program, if any.

In accepting this permit the applicant agrees to fully abide by the requirements and rules of this Commission governing this permitted operation including his responsibility to prevent pollution of state waters during drilling, treating, testing, and producing operations and by the casing, cementing and plugging requirements particularly designed for the protection of state waters and the prevention of intermingling of the contents of all the various zones encountered in this permitted operation.
