Details of Plan of Work: (State names of and expected depths to objective sands:
Show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cement-
ing points, and all other important proposed work.)

    Test to be drilled to depth sufficient to test Muddy and Dakota sands
    expected to be encountered between 5400 feet and 5500 feet below sur-
    face.

    Expect to use ten inch surface casing and five and one-half inch oil
    string (if set). Expect to use approximately 225 feet of surface
    casing.

Approved:...........................   Company....THE DERBY OIL COMPANY............
