Comment This location does not comply with Rule 1003. It appears that interim reclamation activities have been performed to reduce the disturbance areas only needed for production. However, the reclaimed portions of the location do not appear to be progressing towards Rule 1003 standards and regulations as the predominant vegetative cover consisted of undesirable vegetation (e.g. russian thistle and kochia). Additional revegetation/weed management activities are required in order to comply with Rule 1003. Refer to attached inspection photos.

Corrective Action Comply with Rule 1003. The location will remain out of compliance until the corrective action has been resolved.
