Re: Well Completion Report on
#1 Davie, ~~NE NW~~ Section 12-2N-55W,
Morgan County, Colorado
correct
~~NWNE~~

Gentlemen:

As you will note on our original completion report on the above captioned well, we had not tested the gas volume as of December 14th, 1962. However, the gas volume was tested from 4:00 PM on December 14th until 1:30 AM on December 15th, 1962. According to the results obtained during this period, the well produced 122,800 cubic feet of gas per day and 130.5 barrels of oil per day. This would give a GOR of 940/1. Please note that the volume of gas produced during the test included both gas flared and an approximation of gas consumed by the engine and treater. The test was conducted by Mr. Earl Olson of Sterling and he used a two inch orifice well tester with a 3/8ths inch plate.

We hope this information will be satisfactory to you and will finalize our completion report.

Very truly yours,

EXETER DRILLING COMPANY

Warren Arnold,
Petroleum Engineer
