1002 SITE PREPARATION AND STABILIZATION

1002a. FENCING _____

Comment _____

Corrective Action _____

Date _____

1002b. SOIL REMOVAL AND SEGREGATION _____ Fail _____

Comment _____

This location does not comply with Rule 1002.b. During this inspection, it was observed that topsoil was stored on the southern portion of the location, with an estimated volume of approximately 4,000CY. This quantity differs from the estimated salvage of 5,557CY reported on the Operator submitted Topsoil Protection Plan (doc #403514383).

Corrective Action _____

Comply with Rule 1002.b. To ensure that all topsoil has been salvaged from the new disturbance area, ECMC is requiring the Operator to conduct a topsoil stockpile assessment to include a total volume estimate, depth of salvage that occurred and updated map of the total salvage/disturbance area. Provide documentation via FIRR.

The location will remain out of compliance until the corrective action has been resolved.

Date **01/22/2024**

1002c. PROTECTION OF SOILS _____ In Process _____

Comment _____

At the time of this inspection, Staff observed that construction activities were ongoing. The Operator shall ensure that all stockpiled soils are properly stabilized from wind and water erosion. A follow-up inspection will be conducted at a later date to ensure compliance with Rule 1002.c.

Comment: Temporary BMPs have been installed (ditch and berm) around the entire perimeter during the construction phase of the location. At the time of inspection, Staff observed onsite crews wheel packing perimeter BMPs. More permanent BMPs should be installed upon the completion of pad construction. A follow-up stormwater inspection will be conducted at a future date to ensure compliance with Rule 1002.f. standards. Refer to the ECMC Comments section for additional stormwater compliance information.

COGCC Comments

Comment	User	Date
Per Rule 1002.f., oil and gas operators shall implement and maintain Best Management Practices (BMPs) at all oil and gas locations to control stormwater runoff in a manner that minimizes erosion, transport of sediment offsite, and site degradation. BMPs shall be maintained until the facility is abandoned and final reclamation is achieved pursuant to Rule 1004. Operators shall employ BMPs, as necessary to comply with this rule, at all oil and gas locations, including, but not limited to, well pads, soil stock piles, access roads, tank batteries, compressor stations, and pipeline rights of way. BMPs shall be selected based on site specific conditions, such as slope, vegetation cover, and proximity to water bodies, and may include maintaining in-place some or all of the BMPs installed during the construction phase of the facility. Where applicable based on site-specific conditions, operators shall implement BMPs in accordance with good engineering practices.	edwardsond	01/23/2024
