

Final Reclamation Landowner  
Consultation Form  
WELL NAME: Baywatch 22-30

TWN 34S RNG 64W QTR/QTR SE NW Sec. 30

Please confirm below if the road corridor and any associated stream or drainage crossing(s) on your property utilized by Evergreen to access this well existed prior to the drilling of the well:

- Existed prior to well drilling  
Description of original road or

corridor: Landowner wants to keep road in place along with culverts.

What are your requests involving the well pad and associated access road on your property?  
Do you want Evergreen to perform:

- Full Reclamation and restore all disturbed areas as nearly as practicable to predrilling conditions within the boundaries of the surface use agreement

Description Landowner is ok with preexisting contour of pad!

- Partial Reclamation (identify improvements of value to you as a landowner (well pad, road, etc.) that you would like to retain

Description Partial Reclamation has been completed. Landowner ok with reclamation completed!

Seed Mix to be used for Reclamation Reseeding and Revegetation

- Use Recommended NRCS Seed Mix

Comments or changes to this mix: Landowner ok with vegetation growing on pad!

- Use Landowner Specified Seed Mix

Comments NRCS is growing on location

(Provide seed mix tag for variance request)

Reclamation of Access Road(s)

What are your specific requests involving the access road on your property associated with this well?  
Do you want Evergreen to:

- Close the access road and reclaim and recontour. Grade and remove all culverts and any other road improvements and obstructions (fences, gates, cattle guards) that were a part of the access road,

Comments: Landowner wants road in place

- Leave access road, culverts, and other stormwater controls in place for Landowner's use.

Comments: Landowner wants in place.

Reclamation or other work to be completed on access road(s) if Landowner requests that the road be left in place for the Landowner's use;

Landowner's reason for keeping the access road and intended land use: For hunting & Ranching operation!

**Access Road**

- Regrade road
- Fix or add erosion and stormwater controls

- Leave Gravel/ NO Reseed

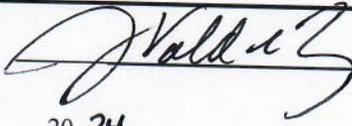

Show location of additional stormwater, erosion control structures to be added on photo, map or drawing

Comments: Landowner wants electric left in place for future reference.

**The COGCC rules require certain actions on the part of Evergreen which cannot be waived by a landowner. Here are some examples of activities Evergreen must perform until COGCC approves final reclamation upon inspection and releases well site from bond:**

- Remove all Evergreen oil and gas production equipment from location
- Remove all Evergreen waste material and debris onsite
- Reclaim all pits, cellars, rat holes and other bores
- Remove guy line anchors
- Perform noxious weed control
- Stabilize areas disturbed during operations and reclaim location for erosion control
- Install stormwater management controls on affected location
- Ensure that leaving a road or well pad in place will not result in significant environmental impact
