Comment

The tank battery related to well API #123-13413 was inspected.
 At the time of the inspection the tank battery location appeared to meet Rule 1003 vegetative standards.
 If any future disturbances (i.e., subsequent operations) affect interim reclamation vegetation, Operator shall reclaim all disturbances as early as practicable to meet Rule 1003 standards.

Comment:	<p>At the time of the inspection the well was not inspected, only the tank battery facility. Due to Well API#123-13413 being the only active well left associated with the tank battery facility all corrective actions will be associated with this well.</p> <p>This tank battery facility does not comply with Rule 1002.f. Stormwater being carried by a diversion ditch created along the production pad surface has created rilling erosion along the Eastern side of the pad. There is also erosional rilling along the West side of the pad that has carried sediment off location. The installed ditch and rip rap have proven to not be sufficient to stop sediment laden stormwater from discharging off location.</p>	
Corrective Action:	<p style="color: red;">Install or repair BMPs per Rule 1002.f. in accordance with good engineering practices.</p> <p style="color: red;">The operator has been contacted via phone and informed of the issues.</p>	Date: 02/18/2024
Pits:	<input type="checkbox"/> NO SURFACE INDICATION OF PIT
