**General Comment:**

On 2/22/2024 Reclamation Specialist Corey McDonough conducted a Storm water and Reclamation Inspection at Logos Operating LLCs Bondad 33-9 32 in La Plata County, Colorado. Inspection #714000463 was submitted on 2/23/2024.

This inspection is being provided as a supplement and update to the original inspection (#714000463), to ensure that accurate Operator is reflected within the Inspection Report. As this is a shared location between Simcoe LLC and Logos Operating, and any corrective actions identified are being provided to both operators in their own respective Field Inspection Report; Inspection #714000463 is being updated to reflect these changes and issued to Simcoe LLC. It is the ECMCs expectation that both Operators will coordinate with one another to resolve the compliance issue(s).

This inspection is a follow up inspection to #693902977.

During the inspection the following compliance issues were observed.

- Storm water
- Debris

Refer to the "Good House-keeping" and "Storm water" sections of this inspection report for additional details.

Refer to the photo-documentation of the observed compliance issues attached to this report.

**COGCC Comments**

Comment	User	Date
<p>Inspection doc #693902977 (dated 3/16/2021) observed that stormwater and erosion control measures were missing or insufficient throughout the Location; erosional channeling and rilling observed on well pad cut and fill slopes and within the working area. Inspection required Operator to comply with Rule 1002.f by 4/12/2021.</p> <p>Operator submitted FIRR #402661551 stating “Storm water controls were installed to stabilize erosion within the project area by 4/12/2021. Storm water controls were selected, sized and installed according to good engineering practices. We will continue to monitor these controls and perform maintenance as needed. CA was addressed”.</p> <p>It was observed in this inspection that BMPs to manage runoff in a manner that minimizes erosion, degradation and sediment transport remains missing, or have not been installed or maintained in accordance with good engineering practices; erosion degradation on the well pad and slopes remain evident, and have persisted since the Resolution was submitted.</p> <p>Due to the ongoing compliance issues on this Location related to 1002.f Rules, no CA date is being provided, and the Location will remain out of compliance until the corrective action has been addressed.</p>	mcdonouc	02/28/2024
