COMMENTS:

An initial form 4 was approved on 7/8/2022 Doc [#403085381], and on 9/22/2022 Doc [#403146429] was approved, marking the well an extended TA with a plug by date of 2030. The initial P&A failed on 9/15/2022 and was added to the problem well list. We attempted to abandon the well with the problem rig on 7/1/2023. Since the initial abandonment attempt and subsequent attempt, pressure have remained below 50 psi (41, 12, 13, and 0) the most recent form 17 light had 0 psi on 10/9/2023. We will continue to perform blowdowns and monitor pressures until we complete the P&A. The pressure chart below show the pressures on the surface casing since the last form 17. We would also like verify the Form 4 is closed out and to (return/ keep) the well on annual testing in compliance with Order 1-232.
