**Comment:** TA - Well found in TA Status.  
 Form 42 403671289 dated 1.30.2024 for MIRU - Well suffered a frac hit. We went fishing in December - unsuccessfully - MIRU to Snub out tbg and fishing tools. Set CICR at +/-5750', check to see if that isolates pressure. If so we'll wrap up ops and plan PTA process. If no we'll run inspection log to assess what needs to be done in the PTA Planning process.  
  
 Rig is off of Well waiting for further action to be done for Plugging Operations.
