OIL & GAS
CONSERVATION COMMISSION

Fort Morgan, Colo.
September 11, 1965

Mr. William R. Smith
Deputy Director
Oil & Gas Conservation Commission
Denver, Colo.

Dear Mr. Smith;

Your letter dated Sept. 1, 1965 and mailed to Hunt Oil Company Dallas Office concerning the Arthur Peterson #3 well in Morgan County has been passed on to me far reply.

See 35 2N 56 W

This is to inform you that this well started producing water the latter part of 1964. In the month of January, 1965 1500 bbls. of water was produced along with the condens ate.

In order to keep producing this well it has become necessary far us to set a pumping unit on the well and keep the water pumped off. During the month of June and July there was no condensate produced, however there was water produced. We have not worked the well over but, as stated above, have set a pumping unit and trying to get what gas production that is possible by pumping off the water.

Very truly yours,

C. E. Yancey
