Good Morning Lorena,

Please see the approval below for the Johnson 2-34 Re-entry. If you would, please confirm that this is sufficient for approval.

Floyd,

You had asked me about the size of the rig and the route we plan to take to the well. I have attached an image of one of our currently working rigs so you can see the size. I have also included a map of the route that we plan to take which is actually the route that you suggested.

**Subject:** Johnson 2-34 Re-entry

Floyd,

Thank you for your time on the phone. Just to reiterate, we are looking to re-enter and re-plug the Johnson 2-34 Well to bring it up to current decommissioning status in preparation for future activities in the surrounding area. We currently have this work scheduled for March 16<sup>th</sup> to March 28<sup>th</sup> 2024. I have attached an aerial showing the well location for your reference.

Per our discussion, I will be asking our crew to visit the location to assess and decide upon access requirements. I will gather more details from the field personnel and will let you know what sort of equipment will be needed and from which direction they would prefer to approach the location.

I will be in touch in the next couple of weeks but please feel free to reach out any time via email or my mobile number below.
