Comment:

Inspection doc #714000145 observed inadequate storm water BMPs that had not been installed per good engineering practices and required compliance by 11/20/2023. It was observed in this inspection that storm water BMPs remain inadequate and sediment transport is degrading interim reclamation areas. Additionally, rutting was observed on the disturbance. No CA date is being provided as this location is out of compliance for the same Rule. Original CA has not been addressed. Original CA and date remains applicable.

Corrective Action:

Comply with rule 1002 Install or repair required BMPs.
