Re: Application to Use an Earthen Pit  
State #1-36, NE NE 36-9N-55W

Dear Mr. Ashburn:

We have received and reviewed this application. We would like to issue this permit and are prepared to do so after the Logan County Commissioners have had thirty days to review the application and make comment to the Commission.

Rule 325 requires a copy of any permit application for any facility which exceeds 100 bpd inflow be submitted to the local county.

Please give us a copy of your (dated) cover letter to the county so that we may start the thirty day 'clock'.

One of our conditions of approval for this permit will be the installation of a skim tank between your treater and first earthen pit. This is in accordance with Rule 328 and is intended to prevent any oil carry-over to open pits both to prevent oil waste and to protect waterfowl.

Thank you for your cooperation. If there are any questions please call.

Yours truly,

James Kenney  
Senior Engineer
