Comment This location does not comply with Rule 1003. Interim areas do not appear to be progressing towards interim reclamation standards with evidence of undesirable vegetation (kochia and russian thistle) observed throughout, and areas of non-uniform vegetation cover resulting in bare/exposed soils. The northern interim area appears to have been recently drill seeded, however, no germination was observed within the area where drill cuttings were incorporated into the soil (ref doc #400850257). Additional reclamation activities required. Refer to attached inspection photos.
