NATURAL GAS CATEGORY DETERMINATION

Date Application Filed 3/3/81 Date Complete 3/3/81 Filing No. 79-86-B

Applicant/Operator Name and Address:

Donnelly Casing Pulling Company

ATTN: Robert Donnelly
223 Main Street, Box 791

Sterling, CO 80751

Well Name and Number: Lousberg #1 A.P.I. #05-123-7914

Reservoir: "J" Sand (Wildcat Field)

Location: Sec. NW SW 18 Twp. 9N Rge. 56W Mer. 6 p.m.

County: Weld

Category Determination Requested: Section 108 (Enhanced Recovery)

Category Determination: X Affirmative Negative*

The following information and reference materials are being submitted to FERC with this determination:

1. List of participants thus far including the applicant and all parties submitting comments on the application. See Application
2. A statement on any matter being opposed. None
3. A copy of the application and all materials required under Part 274, subpart B. A copy or description of materials as required by 274:104(a)(4), amended 8/1/79.

*In the case of a negative determination, only a copy of the determination and a copy of FERC Form 121 will be forwarded to FERC. If the applicant or any aggrieved party so requests within 15-days of a negative determination, all information referenced in 1 thru 3 will be forwarded with the determination to FERC in accordance with 274.104(b).

A jurisdictional agency determination is hereby made that the natural gas referred to above does/~~xxxxxxxx~~ qualify as natural gas produced from a stripper gas well (Enhanced Recovery) in accordance with the applicable provisions of the NGPA.

Douglas V. Rogers, Director

Date: APR 20 1981

274:104(a)(6) EXPLANATORY STATEMENT on reverse side.

The Jurisdictional Agency determination was based on information contained in or added to the Application. Review by the professional staff of the Colorado Commission indicates that this well is an (XXX) (Old) well. The well produces from the "J" Sand

reservoir(x); McKenzie Field. This well qualified as a stripper well under FERC Control

#80-17157. A petition for "enhanced recovery" was subsequently filed showing that the well was completed on December 29, 1973 and stimulated with 750 gals. of acid solution.

On April 16th to the 24th, 1980, the well was cleaned out, some tubing was replaced with new tubing and a new pump was put in as a replacement.

This conclusion was originated by examination of The contents of the application and the completion report.

Which show this well was treated with a process and new down hole equipment which may result in an increase in the rate of gas production. The work performed qualifies as an enhanced production process, therefore qualifying the well as a enhanced recovery stripper well.

And meets the qualifications of a (108) well as defined in the N.G.P.A.
